

SquareGrid

```
graph BT; A[GridWithWeights] --> B[SquareGrid]; C[GridWithWeights] --> B;
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'SquareGrid'. Below it, a horizontal line connects two boxes, both labeled 'GridWithWeights'. A vertical line with an upward-pointing arrow connects the midpoint of this horizontal line to the bottom center of the 'SquareGrid' box, indicating that 'SquareGrid' is a superclass or base class for the two 'GridWithWeights' subclasses.
